

IVAPM's 2019 Pain Management Virtual Symposium

Discover how leading veterinarians are using pain management strategies in their practices

How to Incorporate Pain Management into Your Practice

*Mary Ellen Goldberg, LVT, CVT, SRA, CCRVN, CVPP, VTS-lab animal medicine (research anesthesia), VTS-physical rehabilitation
Douglas Stramel, DVM, CVPP, cVMA*

Veterinarians play a key role in impacting change for the patient, the owner, and the profession. Learn from pain management experts as they provide a comprehensive review of the basic assessment of and a thorough exam for pain, plus the economics for the general practitioner.

Further discussion topics will include:

- The pain management team's responsibilities
- The components of the PLATTER algorithm for pain management: (PLan, Anticipate, Treat, Evaluate and Return Pain scales)
- Pain management compliance

Don't miss this session which gets right to the heart of the roles of pain management, pain assessment and delves into clients' compliance studies.

This program is approved by the AAVSB RACE to offer a total of 6.00 CE Credits (6.00 max) being available to any one veterinarian: and/or 7.00 Veterinary Technician CE Credits (7.00 max).
